

# CINCH IOT

# Mighty Micro Drivers™

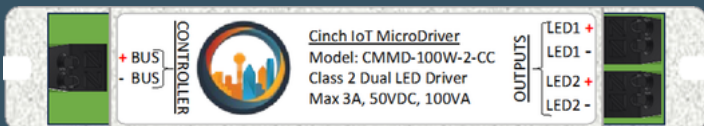

Cinch offers a two-port and five-port Mighty Micro Driver™, designed to efficiently power lights and various devices up to 100 watts. Mighty Micro Drivers can be ganged together to support higher loads. They receive power and communication through a simple two-wire bus connection. This innovative approach makes installation easy, fast, and cost-effective. Mighty Micro Drivers™ support most LED fixtures, from constant current to constant voltage. Perfect for new constructions and retrofits alike, Cinch delivers a scalable, flexible solution that adapts to advancing technology, creating a smart, future-ready building.

## ➔ The Basics

### Mighty Micro Driver™ Features

- Input: 100VA max, 57VDC max
- Output: 2/5 addressable ports, 100 Watt max
- Output: Constant Current 25-1600mA/Ch; Constant Voltage 12-50VDC
- Smooth dimming from 0.1%
- Operating temp: -4°F to 122°F (-20C to 50°C)
- Altitude: Up to 2000 m
- Humidity: 5-95% non-condensing
- Micro Drivers per circuit: 4
- Max distance: Up to 200 m-see cable requirements
- 10 Year Warranty with CinchOne
- Dimensions: 6" L x 1" W x 1" H
- Support the Cinch UL924 Listed Egress System
- Drivers are UL8750 Listed
